Cepho UI/UX Review - SME Team Guide

Overview

Thank you for reviewing the Cepho application's user interface and experience. Your feedback is critical in ensuring the platform meets professional standards and provides an intuitive, consistent experience across all pages and features.

This guide explains the review process, what to look for, and how to provide structured feedback.

Review Objectives

The Cepho UI/UX review has three primary goals:

1. **Design Consistency** - Ensure all pages follow the Manus design language (colors, typography, spacing, components)
2. **Usability & Clarity** - Verify that navigation is intuitive, information hierarchy is clear, and interactions are obvious
3. **Accessibility & Performance** - Confirm that the app is accessible to all users and performs smoothly

---

How to Use This Review

Step 1: Access the Application

Navigate to the Cepho application at: **[INSERT LIVE URL HERE]**

Create a test account or use provided credentials to access all pages and features.

Step 2: Review Each Section

Work through the 14 sections of the **UI_UX_REVIEW_CHECKLIST.md** in order:

- Branding & Visual Identity
- Navigation & Layout
- Core Pages (Landing, Dashboard, Chief of Staff, etc.)
- Components & Interactions
- Typography & Readability
- Icons & Imagery
- Responsive Design
- Accessibility
- Performance & Loading
- Consistency Across Pages
- Specific Feature Checks
- Error Handling & Edge Cases
- Manus Design Language Compliance
- Final Sign-Off

Step 3: Provide Feedback

For each section, check off items that pass review. For items that don't pass, note:

- **What's wrong** - Specific issue or deviation
- **Where it occurs** - Page name and location
- **Why it matters** - Impact on user experience
- **Suggested fix** - How to address it (if applicable)

Step 4: Submit Your Review

Complete the **FEEDBACK_TEMPLATE.md** and submit via email or shared document.

Key Areas to Focus On

High Priority

These areas have the most impact on user perception and should be reviewed carefully:

1. **Dashboard (The Nexus)** - Primary entry point; must be intuitive and visually polished
2. **Chief of Staff Page** - Recently redesigned; verify Manus design language is applied correctly
3. **Navigation** - Sidebar and header navigation must be consistent and accessible
4. **Dark Mode** - All text must be readable; no contrast issues
5. **Mobile Responsiveness** - Test on mobile devices or use browser dev tools

Medium Priority

These areas are important but have less immediate impact:

1. **AI Experts Directory** - Expert cards and filtering should be clear
2. **Daily Brief** - Tab navigation and content organization
3. **Workflow** - Status indicators and project visibility
4. **Library** - Folder structure and content organization

Lower Priority

These areas are nice-to-have but not critical:

1. **Error States** - Helpful error messages and recovery paths
2. **Loading States** - Skeleton loaders and loading indicators
3. **Animations** - Smooth transitions and micro-interactions

---

What to Look For

Design Language Compliance

- Are colors consistent with the Manus palette (primary, secondary, foreground, muted-foreground)?
- Is typography using the correct sizes and weights?
- Are spacing and padding consistent (multiples of 4px, 8px, 12px, 16px)?
- Are borders and shadows subtle and consistent?

Usability

- Can you easily find what you're looking for?
- Are buttons and interactive elements clearly labeled?
- Do hover/focus states provide clear feedback?
- Is the information hierarchy logical?
- Can you complete key tasks without confusion?

Accessibility

- Can you navigate using only the keyboard?
- Are focus states clearly visible?
- Is text readable (sufficient contrast)?
- Are images and icons properly labeled?

Responsiveness

- Does the layout adapt well to mobile (< 768px)?
- Are touch targets at least 44x44px on mobile?
- Is there any horizontal scrolling on mobile?
- Does the desktop layout have appropriate max-width?

Common Issues to Watch For

Color & Contrast

- White text on light backgrounds (hard to read)
- Low contrast ratios (should be 4.5:1 for normal text, 3:1 for large text)
- Hard-coded colors instead of semantic tokens
- Inconsistent color usage across pages

Typography

- Inconsistent heading sizes
- Text too small to read comfortably
- Line height too tight (should be 1.5-1.75)
- Font weights not matching design system

Spacing

- Inconsistent padding inside components
- Uneven margins between sections
- Too much or too little whitespace
- Elements feeling cramped or scattered

Navigation

- Active state not clearly indicated
- Menu items hard to find
- Inconsistent navigation across pages
- Mobile menu not working properly

Components

- Button styles not consistent

- Form inputs missing labels or focus states
- Modal overlays not semi-transparent
- Cards not visually distinct from background

Severity Levels for Issues

When reporting issues, classify them by severity:

Severity	Definition	Examples
Critical	Breaks functionality or accessibility	Text unreadable, button doesn't work, keyboard navigation broken
High	Significantly impacts user experience	Inconsistent colors, confusing navigation, poor mobile layout
Medium	Noticeable but doesn't block usage	Minor spacing issue, inconsistent hover state, missing icon
Low	Minor polish issue	Slightly off alignment, could use better animation, typo

---

Testing Checklist

Before submitting your review, verify you've tested:

- [ ] Desktop view (1920x1080 resolution)
- [ ] Tablet view (768x1024 resolution)
- [ ] Mobile view (375x667 resolution)
- [ ] Dark mode (if applicable)
- [ ] Light mode (if applicable)
- [ ] Keyboard navigation (Tab, Enter, Escape)
- [ ] All major pages (Dashboard, Chief of Staff, AI Experts, etc.)
- [ ] All interactive elements (buttons, forms, modals)

- [ ] All tabs and navigation
- [ ] Hover and focus states

Questions to Ask Yourself

As you review, consider these questions:

1. **First Impression** - Does the app feel professional and polished?
2. **Navigation** - Can I easily find what I'm looking for?
3. **Clarity** - Is the purpose of each page immediately clear?
4. **Consistency** - Do all pages follow the same design language?
5. **Accessibility** - Can I use this without a mouse? Is text readable?
6. **Mobile** - Does this work well on a phone?
7. **Performance** - Does everything load quickly and respond smoothly?
8. **Feedback** - Do I know when something is loading, saving, or has failed?

Timeline & Submission

- **Review Period:** [INSERT DATES]
- **Submission Deadline:** [INSERT DATE]
- **Format:** Complete the FEEDBACK_TEMPLATE.md and submit via [INSERT METHOD]
- **Questions?** Contact [INSERT CONTACT EMAIL]

Next Steps After Review

1. All feedback will be compiled and prioritized
2. Issues will be categorized by severity and component
3. Development team will address critical and high-priority issues first

4. Follow-up review will be scheduled for resolved items
5. Final sign-off will confirm all issues are addressed

Thank You

Your time and expertise are invaluable in making Cepho a world-class product. We appreciate your thorough review and constructive feedback.

If you have any questions during the review process, please reach out immediately.
