Boundless Telecom Group - Investor Presentation

Slide Deck Content Outline
Version: 2.0 (Updated with Strategic Analysis)
Date: January 2026
Format: 16:9, Professional Investment Pitch

Slide 1: Cover

Title: Boundless Telecom Group

Subtitle: Carrier-Grade Global Connectivity for the eSIM Era

Tagline: Not a Reseller. A Platform.

Visual: Clean, professional design with Boundless branding

Slide 2: The Global Connectivity Problem Costs Businesses Billions

Key Message: Traditional mobile connectivity is broken - fragmented, expensive, and impossible to manage at scale.

Content:

- Roaming charges cost global businesses over $30B annually
- Enterprise device management across carriers is fragmented and manual
- Consumers face unpredictable pricing and poor international coverage
- Legacy SIM infrastructure cannot support the connected future

Data Point: 78% of enterprises cite mobile connectivity management as a significant operational burden

---

Slide 3: eSIM Adoption Creates a Once-in-a-Generation Market Shift

Key Message: The transition from physical SIM to eSIM is accelerating faster than predicted.

Content:

- Apple, Samsung, Google eliminating physical SIM trays
- eSIM-enabled devices projected to reach 6B+ by 2028
- Enterprise adoption accelerating for IoT and fleet management
- UAE/GCC leading regional adoption with 40%+ smartphone penetration

Data Point: Global eSIM market growing at 25%+ CAGR

Slide 4: Boundless Delivers Carrier-Grade Infrastructure, Not Reseller Margins

Key Message: Unlike competitors who resell capacity, Boundless operates carrier-grade infrastructure with local IMSI capability.

Content:

- Local IMSI capability provides network-level control
- Lifecycle management (activation, suspension, expiry) built-in
- API-driven provisioning for instant enterprise deployment
- Multi-network resilience architecture
- Compliance-first design for regulated industries

Differentiator: “We control the network. Resellers rent it.”

Slide 5: Dual-Company Structure Captures B2B and Consumer Markets

Key Message: Strategic separation of enterprise and consumer operations maximizes market opportunity.

Content:

Entity	Focus	Value Proposition
Boundless Telecom	B2B Enterprise	Carrier-grade connectivity, API integration, compliance
Boundless Mobile	Consumer	Digital-first, referral-driven, lifestyle brand

Strategy: B2B revenue funds consumer platform development

Slide 6: The Referral Distribution Model Reduces CAC by 60%+

Key Message: Innovative distribution model creates network effects and dramatically reduces customer acquisition costs.

Content:

- Referral-based growth model built into platform architecture
- Each customer becomes a distribution channel
- Network effects compound over time
- Organic growth reduces dependency on paid marketing
- Affiliate program extends reach through partners

Target: CAC 60% below industry average through organic distribution

---

Slide 7: Two-Phase Go-to-Market Generates Revenue Before Scale Investment

Key Message: B2B-first approach validates product and generates revenue before consumer launch.

Content:

Phase 1: B2B Enterprise (Now)

- Target: Corporate travel, fleet management, IoT
- Revenue: Contract-based, predictable
- Purpose: Fund platform development, validate product

Phase 2: Consumer Launch (Q3 2026)

- Target: Digital-first consumers, frequent travelers
- Revenue: Subscription + usage
- Purpose: Scale through referral network

Slide 8: UAE/GCC Market Provides Ideal Launch Environment

Key Message: Strategic focus on UAE/GCC provides regulatory clarity, high adoption, and expansion base.

Content:

- UAE leads regional eSIM adoption (40%+ penetration)
- High-value customer base (business travelers, expats)
- Clear regulatory framework for telecom innovation
- Gateway to broader GCC and MENA expansion
- English-speaking, tech-savvy population

Expansion Path: UAE → GCC → MENA → Global

Slide 9: 15 Key Differentiators Position Boundless for Market Leadership

Key Message: Comprehensive competitive advantages across technology, distribution, and market positioning.

Content (Top 6):

1. Carrier-grade infrastructure (not reseller)
2. Local IMSI capability
3. Referral-based distribution model
4. B2B-first revenue strategy
5. UAE/GCC market positioning
6. Dual-company structure

Additional: Network effects, high margins (50-70%), API-first architecture, compliance-first design

---

Slide 10: Revenue Model Delivers 50-70% Gross Margins at Scale

Key Message: Platform economics support sustainable, high-margin growth.

Content:

Revenue Stream	Margin	Status
B2B Enterprise Contracts	40-50%	Active
Consumer Subscriptions	50-70%	Planned
Referral Commissions	80%+	Planned
M2M/IoT Connectivity	45-55%	Future

Unit Economics Target: LTV:CAC ratio of 3:1+

Slide 11: Financial Projections Show Path to Profitability by Year 3

Key Message: Conservative projections with clear milestones and path to profitability.

Content:

Metric	Year 1	Year 2	Year 3
B2B Customers	50	200	500
Consumer Users	-	50K	250K
Revenue	$2M	$8M	$25M
Gross Margin	45%	55%	60%
EBITDA	-$1M	$0.5M	$5M

Note: Projections subject to validation through pilot customers

---

Slide 12: Strategic Partnerships Accelerate Market Entry (LoI Stage)

Key Message: Active discussions with strategic partners to accelerate growth.

Content:

- Technology Partner: Mobifon (carrier infrastructure)
- Distribution Partners: In discussion with regional distributors
- Enterprise Partners: Pilot discussions with corporate clients
- Channel Partners: Affiliate network in development

Transparency Note: Partnerships represent Letters of Intent or active discussions, not fully secured contracts

---

Slide 13: Expert Team Brings Deep Telecom and Scale-Up Experience

Key Message: Leadership team combines telecom expertise with proven scale-up execution.

Content:

Domain	Expertise
Telecom Operations	20+ years carrier-grade network management
Enterprise Sales	Track record of $50M+ B2B contract wins
Product Development	Built and scaled mobile platforms to 1M+ users
Finance & Operations	IPO and M&A experience in telecom sector
Technology	API-first architecture, cloud-native platforms

Note: Team represented by expertise domains; specific names available upon request

---

Slide 14: Gap Analysis Reveals Clear Priorities for Investment Focus

Key Message: Honest assessment of current gaps informs investment priorities.

Content:

Dimension	Score	Priority
Market Positioning	8/10	Maintain
Growth Strategy	8/10	Maintain
Product Excellence	6/10	Develop
Financial Discipline	5/10	Critical
Team & Culture	4/10	Critical

Overall Score: 62/100 - Strong foundation with clear improvement areas

---

Slide 15: Investment Funds Three Critical Priorities

Key Message: Clear use of funds aligned with gap analysis and growth strategy.

Content:

Priority	Allocation	Purpose
Platform Development	40%	Consumer platform, API enhancement
Team Building	30%	Key hires in sales, product, operations
Market Launch	20%	B2B expansion, consumer pilot
Working Capital	10%	Operational runway

Milestone-Based: Funds released against achievement of defined milestones

---

Slide 16: Risk Mitigation Framework Addresses Key Concerns

Key Message: Proactive risk identification and mitigation demonstrates management maturity.

Content:

Risk	Mitigation
Partner Dependency	Diversify suppliers, secure IP rights
Platform Readiness	Independent technical audit
CAC Validation	Pilot customer testing
Team Gaps	Structured hiring plan
Regulatory	Early engagement with counsel

30 risks identified and documented in full risk register

Slide 17: Exit Strategy Targets 24-Month Liquidity Event

Key Message: Clear exit path provides investor confidence in liquidity timeline.

Content:

Primary Exit Paths:

1. Strategic acquisition by major telecom operator
2. Sale to strategic partner seeking GCC market entry
3. IPO if scale milestones achieved

Timeline: 24-month target for liquidity event

Comparable Exits: Recent eSIM/MVNO acquisitions at 5-8x revenue multiples

---

Slide 18: Investment Ask and Terms

Key Message: Clear investment structure with aligned incentives.

Content:

Element	Details
Raise Amount	[To be specified]
Valuation	[To be determined post-due diligence]
Structure	Equity with standard protections
Governance	Board seat, information rights
Use of Funds	Platform, team, market launch

Next Steps: Due diligence, term sheet negotiation, close

Slide 19: Why Boundless, Why Now

Key Message: Compelling investment thesis with clear timing advantage.

Content:

Why Boundless:

- Carrier-grade infrastructure, not reseller
- Innovative distribution model with network effects
- Strong UAE/GCC market positioning
- Experienced team with telecom expertise

Why Now:

- eSIM adoption at inflection point
- Market leaders not yet established
- First-mover advantage in GCC region
- Platform ready for scale investment

Slide 20: Contact and Next Steps

Title: Let’s Build the Future of Connectivity Together

Content:

- Schedule deep-dive session
- Access data room for due diligence
- Meet the extended team
- Review detailed financial model

Contact: [Contact details to be added]

Appendix Slides (Available on Request)

- A1: Detailed Financial Model
- A2: Full Risk Register (30 risks)
- A3: Technical Architecture
- A4: Competitive Landscape Analysis
- A5: Customer Channel Breakdowns
- A6: Regulatory Compliance Framework

This presentation contains forward-looking statements and projections that are subject to risks and uncertainties.
