Digital Twin Leadership Dimensions Assessment

Supplement to 200 Question Assessment

Version: 1.0
Date: January 16, 2025

Instructions

This assessment measures your alignment with seven leadership thinking styles. For each statement, rate how strongly it reflects your natural approach on a scale of 1 to 10.

Format: Answer as L1-7, L2-8, etc.

Section L: Leadership Thinking Dimensions (70 Questions)

MIT Graduate Thinking (L1-L10)

L1. I prefer to see data and metrics before making decisions.

L2. I naturally break complex problems into component parts.

L3. I think in terms of systems, inputs, outputs, and feedback loops.

L4. I want to understand the technical details, not just the summary.

L5. I value precision and accuracy over speed.

L6. I test assumptions with experiments rather than relying on intuition.

L7. I look for ways to optimize and improve efficiency.

L8. I am comfortable with mathematical models and quantitative analysis.

L9. I prefer solutions that are scalable and repeatable.

L10. I believe most problems have an engineering solution.

Harvard Graduate Thinking (L11-L20)

L11. I think about competitive advantage in every business situation.

L12. I consider all stakeholders and their interests before deciding.

L13. I evaluate decisions based on long term value creation.

L14. I use case studies and precedents to inform my thinking.

L15. I am comfortable with strategic ambiguity and trade offs.

L16. I think about market positioning and differentiation.

L17. I consider the governance and organizational implications of decisions.

L18. I value building relationships and networks for business success.

L19. I think about how decisions affect the overall business portfolio.

L20. I prefer structured debate and diverse perspectives before concluding.

NASA Scientist Thinking (L21-L30)

L21. I plan for worst case scenarios and have contingency plans.

L22. I document processes thoroughly for repeatability.

L23. I identify single points of failure and build redundancy.

L24. I believe in rigorous testing before implementation.

L25. I am uncomfortable with unnecessary risk.

L26. I prefer methodical, step by step approaches.

L27. I review and learn from failures systematically.

L28. I insist on quality assurance and verification.

L29. I think about what could go wrong before what could go right.

L30. I value precision and attention to detail in execution.

McKinsey Consultant Thinking (L31-L40)

L31. I structure problems using frameworks and models.

L32. I develop hypotheses early and test them systematically.

L33. I present recommendations with the answer first.

L34. I ensure my analysis is MECE (Mutually Exclusive, Collectively Exhaustive).

L35. I focus on the “so what” and actionable insights.

L36. I am comfortable presenting to senior executives.

L37. I use $^{80}/_{20}$ thinking to focus on what matters most.

L38. I benchmark against best practices and competitors.

L39. I create clear, visual presentations of complex information.

L40. I drive toward three to five key recommendations.

High Net Worth Advisor Thinking (L41-L50)

L41. I think about capital preservation as much as growth.

L42. I evaluate investments on risk adjusted returns.

L43. I consider tax implications in financial decisions.

L44. I think about liquidity and access to capital.

L45. I consider multi generational wealth implications.

L46. I diversify to manage concentration risk.

L47. I am skeptical of investments I do not fully understand.

L48. I think about the opportunity cost of every allocation.

L49. I prefer recurring, predictable income streams.

L50. I consider estate and succession planning in decisions.

CEO Thinking (L51-L60)

L51. I take ownership and accountability for outcomes.

L52. I balance short term performance with long term sustainability.

L53. I think about organizational capacity and talent.

L54. I make decisions even with incomplete information.

L55. I consider the cultural implications of decisions.

L56. I communicate vision and align teams around goals.

L57. I allocate resources based on strategic priorities.

L58. I hold people accountable for results.

L59. I consider what the board and investors expect.

L60. I think about legacy and the organization I am building.

Visionary Entrepreneur Thinking (L61-L70)

L61. I see opportunities where others see obstacles.

L62. I challenge assumptions and conventional wisdom.

L63. I think about 10x improvements, not incremental gains.

L64. I move quickly and iterate based on feedback.

L65. I am comfortable with ambiguity and uncertainty.

L66. I think about where markets are heading, not where they are.

L67. I am willing to fail in pursuit of breakthrough success.

L68. I look for ways to disrupt existing industries.

L69. I trust my instincts when data is limited.

L70. I believe in creating new value rather than capturing existing value.

Scoring Guide

After completing the assessment, calculate your average score for each thinking style:

Thinking Style	Questions	Your Average
MIT Graduate	L1-L10	
Harvard Graduate	L11-L20	
NASA Scientist	L21-L30	
McKinsey Consultant	L31-L40	
HNW Advisor	L41-L50	
CEO	L51-L60	
Entrepreneur	L61-L70	

Interpretation

Scores 8-10: This is a dominant thinking style. The Digital Twin should heavily weight this perspective in recommendations.

Scores 5-7: This is a supporting thinking style. The Digital Twin should incorporate this perspective when relevant.

Scores 1-4: This is a less natural style. The Digital Twin should use this perspective to challenge blind spots and provide alternative viewpoints.

Integration with Digital Twin

Once completed, these scores will be used to:

1. Weight how the Digital Twin frames recommendations
2. Determine which perspectives to lead with in analysis
3. Identify areas where the Digital Twin should proactively challenge your thinking
4. Customize communication style to match your preferences
